

Mobile Elevating Work Platforms

from Unipart Rail

The most innovative and technically advanced MEWPs available

Flexible and versatile options to suit a variety of rail projects

Green Technology designed to lower emissions

Large 992lb basket with 360° degree rotation

Option to fit an advanced pantograph

WESTCODE

a Unipart Rail Company

The most innovative and technically advanced range of MEWPs available across the global rail industry.

Unipart Rail is working in partnership with Rail Products - designer, developer and manufacturer of specialist rail borne Mobile Elevating Platforms (MEWPs).

Rail Products are working in conjunction with Manitou and have just launched four new machines developed with the latest green technology to lower emissions and reduce their environmental impact.

Features and Benefits

- Flexible options to suit a variety of rail projects - OLE, Maintenance, Bridge and Tunnel
- Large 992lb basket with 3 access points enabling 3 people to work at any one time
- Option to fit an advanced pantograph which will take height and stagger measurements while the vehicle is moving
- EU Stage V compliant diesel engines fitted (meets US Tier 4 Final specification)
- Fully integrated control panel with dynamic visual display as well as crush protection
- The only MEWP available with a 360° basket rotation
- Multi-Gauge option available for fitment to all machines
- LED Lighting system creates a safe working environment
- Approved for use in line with all local rail standards worldwide

Fully integrated control panel

The Product Range

Rail Products produce the full range of high quality, rail approved machines from the modern, purpose-built factory in Poland and export their machines around the world throughout Europe and Australasia.

RP 450V

With EU Stage V compliant engines, the RP 450V is one of the most technically advanced and eco-friendly MEWPs available

RP 450MV

Multi-gauge version of the RP450V MEWP to suit track gauges from 1000mm to 1600mm (3ft 3 3/8in to 5ft 3in)

RP 450HV

A hybrid solution with a Stage V compliant combustion engine & battery powered electric motors automatically managed

RP 450HMEV

A multi-gauge version of the full hybrid machine

PA 64 PANTOGRAPH

Fits all Rail Products MEWPs and can be used on overhead lines ranging from 13ft 78" to 20ft 99" high to record height and stagger measurement whilst on the move
